3D Leather Wall panels Installation.

Installation process is surprisingly simple.

The 3D leather panels can be installed permanently on the wall,

or as temporary modular panels that can be removed from the wall at any time.

When installing directly on a wall

- Measure the area, decide on a layout and mark the wall.
- Using regular hot glue gun, drop a few melted hot glue dabs on the corners, and the center (back side of the tile) and press the tile to the wall.
- Hold it for about a minute to let the glue harden and cool.
